CONTENTS

Special Issue: Spectroscopy, Theoretical Chemistry and Molecular Structure, A Collection of Invited Papers in Honour of Professor K.S. Pitzer

Dedication to K.S. Pitzer ..... *ix*

Molecular mechanics calculations (MM2) on organometallanes of germanium, tin, and lead
N.L. Allinger, M.I. Quinn, K. Chen, B. Thompson and M.R. Frierson (Athens, GA, U.S.A.) . 1

Conformational studies of bacterial peptidoglycan: structure and stereochemistry of *N*-acetyl-β-D-glucosamine and *N*-acetyl-β-D-muramic acid
P.N.S. Yadav and D.K. Rai (Varanasi, India) and J.S. Yadav (Newark, NJ, U.S.A.) 19

Computer simulation of the cross peak patterns in NOESY spectra of oligonucleotides: an aid to accurate structure determination in aqueous solution
A. Sheth, R.V. Hosur and G. Govil (Bombay, India) 33

Ab initio study of interactions between methanol and nitrogen or carbon monoxide
Z. Latajka and H. Ratajczak (Wrocław, Poland), J. Murto (Helsinki, Finland) and W.J. Orville-Thomas (Salford, Gt. Britain) 45

An ab-initio study of the proton affinity of conjugated Schiff-base and related nitrogen compounds: an analysis of the triggering site of bacteriorhodopsin
N. Sreerama and S. Vishveshwara (Bangalore, India) 61

Raman spectral studies on interactions of Br^- ions with CD_3 group of acetonitrile, nitromethane and dimethyl sulfoxide
K. Venkata Ramana and S. Singh (Madras, India) 73

Calculations for CH_4 in a tetrahedral site in an Xe matrix
M.P. Roberts and H.L. Strauss (Berkeley, CA, U.S.A.) 83

On the reliability of SCF ab initio calculations of vibrational frequencies and intensities of hydrogen-bonded systems
Z. Latajka and H. Ratajczak (Wrocław, Poland) and W.B. Person (Gainesville, FL, U.S.A.) .. 89

Raman spectroscopic studies of substituted bipyridines, their ruthenium(II) complexes and surface-derivatized TiO_2
S. Umapathy, G. Lee-Son and R.E. Hester (York, Gt. Britain) 107

Infrared diode laser absorption study of free jets of NH_3
P.N. Bajaj, R.K. Talukdar, P.K. Chakraborti and V.B. Kartha (Bombay, India) 117

Geometry changes induced by negative hyperconjugative interactions involving carbonyl and thiocarbonyl groups
P.V. Sudhakar and J. Chandrasekhar (Bangalore, India) 135

Effects of electron correlations in conjugated organic molecules and solids
S. Ramasesha (Bangalore, India) 149

A study of the electronic structures of *n*–*v* addition compounds of BH_3 by a combined use of UPS and EELS
T. Pradeep, C.S. Sreekanth, M.S. Hegde and C.N.R. Rao (Bangalore, India) 163

On the generalized continuum model of dipolar solvation dynamics
B. Bagchi (Bangalore, India), E.W. Castner and G.R. Fleming (Chicago, IL, U.S.A.) 171

Theoretical studies on the stabilities of 1,2- and 1,3- isomers of cyclic $H_4A_2X_2$ (A=C,Si, X=O,S,CH2): the anomeric effect at silicon
P.N.V. Pavan Kumar (Hyderabad, India), D.-X. Wang, B. Lam and T.A. Albright (Houston, TX, U.S.A.) and E.D. Jemmis (Hyderabad, India) 183

Ab-initio calculations on the protonation of simple amides by H_3O^+. Effects of discrete hydration and solvent cavity
M. Hodošcek, V. Harb and D. Hadži (Ljubljana, Yugoslavia) 191

Computer simulation of protein–carbohydrate complexes: application to arabinose-binding protein and pea lectin
V.S.R. Rao, M. Biswas, C. Mukhopadhyay and P.V. Balaji (Bangalore, India) 203

Photolysis of allene–ozone mixtures at 647 nm in cryogenic matrices. Part 1. Formation of allene oxide
K.A. Singmaster and G.C. Pimentel (Berkeley, CA, U.S.A.) 215
Tautomerism of nucleic acid bases and the effect of molecular interactions on tautomeric equilibria
W.B. Person, K. Szczepaniak, M. Szczesniak, J.S. Kwiatkowski,. L. Hernandez and R. Czerminski (Gainesville, FL, U.S.A.) 239
Conformational analysis from low-frequency vibrational data and ab initio calculations for 3-chloropropene
J.R. Durig, D.T. Durig, M.R. Jalilian, M. Zhen and T.S. Little (Columbia, SC, U.S.A.) 259
Structural studies and vibrational analyses of stable and less stable conformers of 1,3,5-hexatriene based on ab initio MO calculations
H. Yoshida, Y. Furukawa and M. Tasumi (Tokyo, Japan) 279
Inversion and torsional motions of methylhydrazine studied by microwave and far-infrared spectroscopy and ab initio calculation
N. Murase, K. Yamanouchi (Tokyo, Japan), M. Sugie, H. Takeo and C. Matsumura (Ibaraki, Japan), Y. Hamada, MN. Tsuboi and M. Kuchitsu (Tokyo, Japan) 301
